

PUBLIC LEDGER

WEEKLY REPUBLICAN—1907.
DAILY PUBLIC LEDGER—1899.

MAYSVILLE, KY., MONDAY, APRIL 16, 1906

ONE COPY—ONE CENT.

SIX PAGES TODAY

It will profit you to read the Street Paving Ordinance printed elsewhere.

B. M. Ricketts, one of Cincinnati's eminent surgeons, was in the city yesterday.

Leo, five-year-old son of Mr. and Mrs. Verner Dryden of the East End, has the whooping-cough.

The I. O. R. M. attended the M. E. Church in a body last evening and heard a splendid sermon delivered by the Pastor, Rev. G. W. Buntou.

Mr. George Hunt has bought from William Holliday the house and lot adjoining his home in Second street, Sixth Ward; consideration, \$1,300.

W. J. Rice, Cashier of the Bank of Morehead, has been offered a similar position in a new bank to be started at Porto Rico by Louisville people.

The town was full of people Saturday and business was exceptionally good. It looks like old times to see the throngs going in and coming out of the stores.

A total of 4,200,000 pounds of tobacco have been purchased in Nicholas county by the American Tobacco Company at an average of a little over 8 cents per pound.

The Police of this city were notified to be on the lookout for Gaines Grierson and Ben Cooper, two lads who lit out from Manchester yesterday with \$100 of papa Grierson's money to see the world.

Call and let me show what a handsome Diamond Ring, Stud or Pendant I can sell you for little money. Prices are guaranteed lower than you buy for anywhere.

P. J. MURPHY, the Jeweler.

The U. S. P. Sarsaparilla for your blood. 50c. Sallie Wood's Drugstore.

SUICIDED YESTERDAY

Elijah T. Rees, One of Mason's Most Prominent Farmers

Mr. Elijah T. Rees suicided last evening shortly after 6 o'clock at his home near Shannon.

For some time Mr. Rees had been subject to spells of melancholia, brought on, it is thought, by looking after his large business interests.

Last evening, on his return from spending part of the day away from home, he sat down to eat his supper as usual, and during the evening meal he left the dining-room and took the fatal dose of poison.

Conscious of his fearful act, he told his wife of his deed, and though aid was promptly rendered he succumbed in a short while.

Mr. Rees was 67 years of age and was one of Mason's most progressive farmers and one of its largest land owners.

He was related to many of the most prominent families in this section, being a brother of Messrs. T. J. Rees of Washington and W. J. Rees of Lexington, and of Mrs. James N. Kirk and Miss Eva Rees of the county.

Surviving him are his wife and six children—two daughters and four sons—ranging in age from 3 to 15 years.

The funeral will take place at 10 o'clock tomorrow morning from Shannon Church, with services by the Rev. Mr. Ecklar of Sardis, and the remains will be laid to rest in the Cemetery at Shannon.

Miss Davis's Silver Soap at Miss Amelia Wood's room, Court street.

Mrs. J. W. Mattox, formerly of Cincinnati, died Saturday at Wagoner, I. T.

Mr. Conrad P. Raap has been appointed a substitute clerk in the railway mail service.

There is something about the character of a newspaper correspondent as he is shown on the stage that is irresistibly attractive. He is always breezy, humorous, Bohemian, ready for fun, work, or any old thing that comes along. In Gordon & Bennett's "A Royal Slave," which will be seen at the Washington Theater Thursday, April 26th, there is a correspondent who not only gets the news but gets the right people out of trouble, and the other people in trouble, and finally gets the dainty dancing girl as well.

MASONIC NOTICE.

Special meeting of Mayville Lodge No. 52, F. and A. M., tonight at 7:30. Conference of Fellowcraft Degree. All members urged to be present. S. P. BROWNING, W. M., Gordon Sulzer, Secretary.

Stop for sale at Limestone Distillery on and after March 22d.

Alexander H. Robertson, former Judge of the Circuit Court at Lexington, died at his home in Springfield, Ill., aged 86.

It is probable that the rectifying plant of the Old '76 Distillery, Newport, one of the largest in the state, will leave Kentucky and move to Cincinnati owing to the recent passage by the Legislature of the revenue bill taxing rectified spirits 1 1/2 cents. This would make a difference of thousands of dollars to the Newport Distillery.

BUY SNOW WHITE LIME.

Our just arrived. White as snow. M. C. RUSSELL CO.

AN EASTER GIFT!

Saturday, April 14th.

Every one bringing their Stamp books to our Premium Department will get \$1 worth of Stamps FREE as an Easter gift. GLOBE STAMP CO.

ASK ONE OF YOUR FRIENDS
WHO HAS
BEEN COOKING WITH GAS!

How she likes her Range. The expressions we hear: "Oh, I think it's fine!" "I would not be without one!" "I can't imagine why I haven't had one before now!" "People are awfully slow about catching on to a good thing. I didn't tumble until last summer." Every day the weather permits our fitters are busy running pipes for Gas Range connections. If you want yours ready for use when it gets hot don't wait, but place your order NOW.

COOK WITH GAS. SEE THE GAS CO.

Patton's Sun-proof PAINT.

It is a ready-mixed, strictly Pure Paint, covers 330 feet of surface two coats to the gallon. A Five-Year Written Guarantee goes with each gallon. Send for color card.

D. HECHINGER & CO.

THE HOME STORE.

Of course you young fellows DON'T WANT and WON'T WEAR the clothes we choose for your "Governors." We know that the staid, maturer effects that please THEM can't possibly appeal to your more finicky fancy. We know that you know, and we bought

COLLEGE BRAND CLOTHES

just for your sake. Nothing conservative about these suits. They're togs like the merchant tailors create in college towns,—as extreme, as graceful, as boldly original, as well setting and very much less in cost, as much less indeed as the "ordinary common garden variety" of ready-made clothes. Come in and let us show them to you.

THE HOME STORE.

D. HECHINGER & CO.

For the annual couclave of Kentucky Knight Templars at Paris in May, Coeur De Leon Commandery has already arranged for three dances, ten receptions, exhibition drills and two daily concerts by the First Regiment Band of fifty men.

Leads to road of health—"Alpha" Flour.

You can get your Easter Egg Dye—all colors—5 cents at Sallie Wood's Drugstore.

A street oiling machine, with a capacity of 600 gallons, has been purchased by the Paris City Council at a cost of \$450.

The Particular Baptist Church building, an old-time brick structure, was sold at Mt. Gilead recently for \$142. The purchasers were Charles and Clate Farrow, who will tear it down, with the view of using the material for a new building.

At Louisville, Dr. Dudley S. Reynolds has been granted an absolute divorce from Mrs. Mattie Bruce Reynolds.

The Past Great Sachems of Kentucky Redmen will hold a three days meeting at Frankfort beginning May 8th.

The Approach of Warm Weather Will Make These

BARGAINS

Appreciated; the prices will make them doubly attractive.

36 in. White Irish Linen, 45c Value . . 29c

36 in. White Irish Linen, 50c Value . . 32c

The demand for these goods for shirtwaist suits is unprecedented.

We Have Also Three Lots of White Persian Lawn Which We Offer at 12 1/2c, 15c, 19c Yd.

You must see them. Only in a bona fide closing-out sale can such values be offered.

J. M. NESBITT, Executor

Get your Easter Dyes at Ray's Drugstore. All colors, 5c package.

Mr. Preston D. Wells, who has been ill for the past six weeks with typhoid fever, was able to be out Saturday for the first time.

Mr. A. D. Cole, one of the leading counsel in the prosecution of the Thacker case, is attending the Federal Court in Covington today.

The Ladies' Aid Society of the First Baptist Church will meet Wednesday afternoon at 2 o'clock with Mrs. L. Langofele of West Second street.

The Colored Knights Templar in handsome uniforms and waving plumes presented a very good appearance as they marched from their hall to the Church to attend Easter services yesterday afternoon.

All the members of the congregation are urged to be present at the Sunday-school social to be given at the First M. E. Church, South, this evening at 7:30 o'clock. There will be an "egg hunt" for the small children.

As might have been expected, Mr. Christy Devine, who left here some time ago to take a position in Holmes, Tolle & Evans's store at East St. Louis, has made good and will soon take charge of one of the firm's stores at Belleville, Ill.

The Bourbon County Agricultural Society has purchased the C. M. Thomas land, twenty-three acres, close to Paris, on which the fair will be held in September. An eighth of a mile track is being built, and a crescent-shaped amphitheater with a seating capacity of 5,000 will be built.

Seed Oats and Tobacco Fertilizer. WINTER & EVERETT.

Mr. R. A. Carr has in his employ an up-to-date miller in the person of Mr. George M. Thompson, a man of experience and ability.

In overhauling the cold storage department at Breeze's grocery in Market street the other day three dozen eggs—one layer in a case—was discovered that had been placed there eight years ago. At that time they were 35 cents a dozen. When taken from their hiding place nothing remained but the shell.

EXTRA SHEET

"The Ledger" Will Print Six Pages Every Day This Week

On account of the extreme length of the city ordinance covering brick street construction, THE LEDGER will all this week appear in six-page form.

It has been no small undertaking to get this matter ready for publication today; the wretched service of the Cincinnati Postoffice and the Western Union Telegraph Company necessitated the printing of our extra pages on yesterday—Easter Sunday though it was,—and even that would not have been possible but for the prompt work of the A. N. Kellogg Newspaper Company and the accommodating help of Colonel Robert M. Cartmell and Major Charles Heimer of the Adams Express Company's local office.

HANDSOME BLACK SILKS

Among the richest are Taffeta Radium, Zephyr and Chiffon. They are soft and brilliant with the kid finish so popular this year. While the weave in each is taffeta it is extremely fine, making the silk almost as soft as crepe de chene. Another new weave is Drap de Milo. Woven with a round cord and while slightly heavier than the first named silks, it's supple enough to drape gracefully. All these Silks are absolutely pure dye in the finest tones of black, and range in price from \$1 to \$2.

Our silk counter also has a special offering of Taffeta Mousme in fancies and solid colors, at 69c yard. This is a most effective silk for dresses, waists and kimonas. Black, white, champagne, tan, jaspar, reseda, mais, gun-metal, blue, pink, cardinal.

Smart Covert Coats.

A dozen new styles have just been added to our ample collection. The merit in Hunt Coats is quality and exclusive style. The surprise is that prices on such handsome garments are so low—\$5 to \$15—and when you SEE the coats you'll realize the modest price.

Alterations without charge.

Agents for the celebrated wootex garments.

D. HUNT & SON.

Fresh Fish daily at Restaurant Royal.

The remains of Mrs. Caroline Hunter, whose death at Minneapolis has been noted, were interred Saturday in Cave Hill Cemetery, Louisville. Mrs. Hunter's death was the result of a fall in which she sustained a broken hip.

Cartmell extracts teeth without pain.

A bill has been introduced in Congress to reimburse the state of Kentucky in the sum of \$1,400.44 for the cost of returning and caring for Kentucky's sick soldiers in the Spanish-American War.

This is the season to buy good Mental work cheap. See MURRAY & THOMAS.

For Rent—The rooms on the second and third floors of the building occupied by Porter & Cummings in East Second street.

JOHN DULEY.

New Sample Piano, \$199.99 at Gerbrich's.

I have for sale two of the most delightful homes in Maysville which are complete in all their appointments. If you want a modern home at a reasonable price do not fail to apply at once. Delays are dangerous. JOHN DULEY.

GREEN and GAYNOR, the rascally contractors who robbed Uncle Sam at Savannah, were lucky fellows after all. In addition to four years each in the Pen, they drew a bargain counter fine—\$575,649.90, marked down from \$575,650.

DR. A. G. BROWNING, who is if anything a Humanitarian with a big "H," won his fight for a hospital room in the County Jail. It was creditable to the Doctor to ask it; it was both creditable and generous in the Fiscal Court to grant it; and the public will approve the action of each.

ACCORDING to a bulletin issued by the Department of Commerce and Labor, the total value of agricultural products exported from the United States for the eight months of the fiscal year 1906, ended with February, was \$700,000,000, as against \$570,000,000 in the same period of 1900, \$664,000,000 in 1902 and \$568,000,000 in 1905. The growth in the exports of agricultural products, says the bulletin, occurs in all of the three great groups which form the bulk of agricultural exports, viz., breadstuffs, cotton and provisions, the latter term including meat and dairy products. The gain in breadstuffs was \$70,000,000, in provisions \$33,000,000 and in cotton \$30,000,000. The percentage which manufactures form of exports in the eight months ended with February, 1906, is 32.8, while they formed but 27.2% of the total exports in the corresponding months of 1903 and 22.5% in the corresponding months of 1898.

Won't some sympathetic Goebelite please stand up and indorse Judge CANTRILL's course in drawing a \$5,000 salary that he hasn't earned, or even attempted to earn?

AMERICANS may not offer tourists such an industrious eruptionist as Mt. Vesuvius; but her JOHN ALEXANDER DOWIE and Senator BENJAMIN PITCHFORK TILLMAN are fairly good seconds.

Just what municipal ownership means to the taxpayer is to be seen by a comparison of the financial standing of the telegraph lines of England under private and public ownership. The New York Times has been making an inquiry into this phase and it says editorially:

"Our correspondence from London gives some interesting facts as to the cost of the Government operation of telegraphs in the United Kingdom which the advocates of public ownership and operation of public utilities would do well to study. Taken over in 1870-71, when they were paying to the owners a profit of \$1,710,000 a year, the telegraphs cost the Government, that is to say, the taxpayers, last year \$4,610,000 excess of expenditure over receipts, besides \$1,358,500 in interest on the purchase money, a net loss of \$5,968,500. The service is much complained of, but if it were excellent it is plain that those enjoying it are doing so at the expense of those who do not use it."

Government operation of the telegraph lines in Great Britain, says The Times-Star, has been one of the favorite arguments of the demi-Socialists, but it is evident that they have never inquired into the detail of cost—but as the majority of them pay no taxes it is not apparent that this feature should perplex them.

Savannah News.

One morning a Sunday-school was about to be dismissed and the youngsters were already in anticipation of relaxing their cramped little limbs after the hours of confinement on straight-backed chairs and benches, when the Superintendent arose and, instead of the usual dismissal, announced: "And now, children, let me introduce Mr. Smith, who will give us a short talk."

Mr. Smith smilingly arose, and after gazing impressively around the classroom, began with: "I hardly know what to say," when the whole school was convulsed to hear a small, thin voice back in the rear lip: "They amen and thit down!"

Biliousness

"I have used your valuable Cascarets and find them perfect. Couldn't do without them. I have used them for some time for indigestion and biliousness and am now completely cured. Recommend them to everyone. Once used, you will never be without them in the family."
Edward A. Mars, Albany, N. Y.

NOTICE is hereby given that a meeting of the stockholders of the Green River Tobacco Company, a corporation created and organized under the laws of the state of West Virginia, held at Mayville, Ky., on the 7th day of April, 1906, and the following resolutions were adopted:

Resolved, first, That the Green River Tobacco Company, a corporation created and organized under the laws of the state of West Virginia, does hereby discontinue business as a corporation and surrenders to said state its charter and corporate franchises, having disposed of all its assets to the Weisinger Tobacco Company, a corporation duly incorporated under the laws of Kentucky.
Resolved, second, That the President of this corporation cause notice of the adoption of the foregoing resolution to be published in THE MAYSVILLE PUBLIC LEADER once a week for four successive weeks, and that he certify these resolutions to the Secretary of State of the state of West Virginia, and deliver to him a certificate showing the publication of said notice, as provided by law. Given under my hand this 7th day of April, 1906.
E. A. ROBINSON,
President of said corporation.
Attest—
J. D. Ditz, Secretary.

STREET PAVING ORDINANCE.

Continued from Third Page.

who shall be liable for the safekeeping thereof on his official bond.

Said bonds shall not be issued upon the faith and credit of the City of Mayville for the payment thereof, but the faith and credit of the City of Mayville shall be pledged for the sums realized upon the apportionment against the property for the cost of the paving and curbing said streets as in this ordinance provided, only after the same shall have been collected and paid to the Treasurer, as in this ordinance provided; and said bonds shall be redeemable and payable not on the faith and credit of the city, but out of, and secured by, lien on the assessments to be made and apportioned against said lots and parts of lots or lands abutting on the streets and parts of the streets so herein ordered to be paved and curbed. All money paid, received or collected upon the assessments against the lots, as in this ordinance provided to be made, and interest on the deferred annual payments, as provided in said section No. 5 of said act, approved March 24, 1894, and all money arising from the sale of bonds herein provided for shall be kept by the City Treasurer in a separate fund to be known as the Street Improvement Fund; and said bonds shall be paid out of the amount realized upon said assessments to be made and apportioned upon the said properties abutting upon said streets and parts of streets as above, and said assessments secured, paid and collected as provided for in like cases in Section 5 of Act of the General Assembly of the Commonwealth of Kentucky, entitled "An Act to Amend an Act for the Government of Cities of the Fourth Class," approved June 28, 1893," and approved March 24, 1894, and being Sections 3575 and 3576 of the Kentucky Statutes.

Section 7. All moneys received from the assessments in this ordinance provided to be made, shall be appropriated and paid out upon the order of the Board of Council upon the City Treasurer, and for the payment of the interest and redemption of the bonds which may be issued for the payments herein provided for and for no other purpose.

Section 8. The cost of said improvements, assessed against any piece of ground or owner thereof, shall not exceed one-half of the value of such ground after improvements are made, excluding the value of all buildings and other improvements upon the property so improved.

Section 9. Said bonds shall be in substance, form and effect as follows, except as to the consecutive number to cover said fractional part of \$500 provided for in Section 4 of this ordinance, and the date of maturity of the three sets of bonds, the said three sets of to mature as hereinbefore provided.

No. \$500.00.
State of Kentucky, City of Mayville: Know all men by these presents, That the City of Mayville, in the State of Kentucky, promises to pay the bearer the sum of Five Hundred (\$500.00) Dollars on the ... day of ... 190... at the Bank of Mayville, Mayville, Kentucky, with interest thereon at the rate of six per cent. per annum from date hereof until the payment of said principal sum, upon the presentation and surrender of the proper coupons hereto annexed by the Mayor, at said Bank of Mayville, Kentucky, for the payment of which said sums and interest, the faith and credit of the City of Mayville, Kentucky, is hereby held and firmly bound to make, but only out of the sums realized upon the apportionment against the property and lots abutting streets to be improved, under and pursuant to ordinance of the Board of Council of the City of Mayville adopted the ... day of ... 190... after the said sums shall have been collected and paid to the Treasurer of said city; neither said amount nor said interest shall be payable or redeemable on the credit and faith of the said City, nor shall said principal or interest be deemed a debt against said City, but shall be payable out of an secured by a lien on the assessments to be made and apportioned by said City against said lots and parts of lots, or lands, abutting on said streets and parts of streets in said ordinance ordered to be paved and curbed. The principal sum of this bond shall be payable at maturity upon presentation and surrender of the same at said Bank of Mayville, Kentucky.

This bond is one of a series of bonds numbering from 1 to ... inclusive, for Five Hundred (\$500.00) Dollars each, and one numbered ... of ... and known as street paving bonds, and issued under the authority granted by Sections 3572, 3, 4, 5 and 7, Kentucky Statutes, as amended March 24, 1894, and also in accordance with the resolution and ordinances passed, authorizing the issuance and sale of bonds by the Board of Council of the City of Mayville, Kentucky, on the 1st day of July, 1906.

The right is reserved to redeem this bond at the option of the City of Mayville, on 1st day of July, 1908, or 1st day of July of any year thereafter, by paying par of said bond, and all interest coupons due on date of said redemption.

In testimony whereof the Mayor and City Clerk of the City of Mayville, Kentucky, have set their hands and caused the corporate seal of said city to be affixed, this 1st day of July, 1906.

Mayor.

City Clerk.

Upon each of said bonds shall be attached appropriate number of coupons; on bond for the last partial amount the coupons shall be for the appropriate amount at said rate of interest, and the interest coupons on each of said bonds shall have the fac-simile of the signature of the Clerk of the City.

COUPON.

\$30.00.
The City of Mayville, Kentucky, out of the same funds for which this bond and coupon is given and payable, will pay the bearer the sum of thirty (\$30.00) dollars at the Bank of Mayville, of Mayville, Kentucky, on the day of ... 190... being one year's interest on Bond No. ... Street Paving Bonds issued pursuant to Ordinance of the Council of the City of Mayville, Kentucky, adopted the ... day of ... 190...

Section 9. W. E. Staileup, Mayor, Jas. Outten, Clerk, and Jas. W. Fitzgerald, City Treasurer, of the City of Mayville, Ky., are hereby appointed a Committee to advertise for bids for paving

and curbing of said streets and parts of streets, as in this ordinance provided, and in accordance with the specifications adopted by this board, and they shall adopt such means of advertising as in their judgment shall be productive of the greatest benefit and procure the largest number of bids, the said bids to be sealed, endorsed Street Paving Bids, and directed to the City Clerk, who shall keep them and open them in the presence of the City Council. Each bidder shall accompany his bid with a certified check on a National Bank, payable to the order of the City Treasurer for Five Hundred (\$500.00) Dollars which amount will be returned in case of a rejection of said bid, and to the successful bidder, upon acceptance of his bid and formal execution of contract, the City to reserve the right to reject any and all bids.

Section 10. All ordinances and parts of ordinances in conflict herewith are hereby repealed.

Section 11. This ordinance shall be in full force and effect from and after its adoption and publication in the manner provided by law.

Adopted ...
Approved ...
Mayor.

Board of Trade

"FOR THE HONOR AND GLORY OF GREATER MAYSVILLE."

The following officers and directors are requested to meet at John Dwyer's office at 7:30 o'clock Tuesday evening, April 17th, to consider matters of vital importance to every man, woman and child in this city:

D. Hechinger,
J. B. Russell,
W. H. Means,
Thomas A. Davis,
J. W. Fitzgerald,
Vernor Dryden,
J. Ed. Parker,
John Dwyer,
C. M. Phister,
George R. Parker,
W. W. Wilcox,
E. L. Manchester,
W. E. Staileup,
Joseph O'Donnell,
Harry Barkley,
Godfrey Hunsicker,
W. W. Ball,
Millard Merz,
H. C. Carran,
Mike Brown,
John J. Altmeyer,
E. F. Browning,
M. F. Coughlin,
John C. Everett,
James N. Kehoe,
George H. Frank,
H. S. Ellis,
John M. Hunt,
Robert B. Owens,
J. Wesley Lee,
W. Holton Key,
T. M. Russell,
Charles D. Pearce,
J. F. Barbour,
Dr. Edwin Matthews.

It is the desire of the Directory to enlist every merchant, Minister, professional man, and in fact every inhabitant in the city of Mayville, in the work of the Board of Trade. Some new features will be suggested at this meeting which we are satisfied will enlist the hearty support of all.

The Committee on Membership will be glad to have your name to report at this meeting. Remember the time and place, Tuesday evening, April 17th, at 7:30 o'clock, John Dwyer's office, 215 Court street.

If the rooms are not large enough to accommodate the crowd, the meeting will adjourn to the Council Chamber. Any citizen of Mayville will be welcomed.

Mrs. Rebecca Coyle, aged 93, is dead at her home near Owingsville.

At Catlettsburg Saturday John Winnebush was given 21 years in the Pen for killing John McCoy. Both colored.

John Mitchell, President of the United Mine Workers, closed his headquarters in New York Saturday and left for Indianapolis. He said there was absolutely nothing new in either situation.

Building Associations

The receipts of the several Building Associations of this city Saturday night were as follows:

Nelson County.....	\$ 375.55
Limestone.....	298.15
People's.....	384.35
Total.....	\$1,058.05

MRS. HARRIET BALDWIN.

Mrs. Harriet Baldwin, born in Maryland October 20th, 1814, died suddenly at her home on Jersey Ridge early yesterday morning.

She had retired the night before in apparently good health and arose yesterday morning in good spirits. She was in the act of bathing her face, when her son noticed her in a stooping position. He went to her and assisted her to bed, when she expired without a word.

Mrs. Baldwin came to this county when quite young, and was the last of the early pioneers of the section where she spent the greater portion of her life.

She leaves three children—two sons, John and Edward, and one daughter, Miss Belle Baldwin. Miss Ida Martin of Covington is a granddaughter, while numerous other relatives reside in this city and county.

The funeral will take place tomorrow afternoon at 1 o'clock, ann time, the services being conducted by the Rev. P. A. Cave of the Christian Church.

The remains will be interred in the Mayville Cemetery.

IRENE WATKINS.

Irene, the infant daughter of Mr. and Mrs. Richard Watkins, died Saturday at 12 o'clock at their home in West Second street and was buried yesterday at 2 o'clock. Services by the Rev. George W. Bunton.

Gage marks 2.6 and rising.

The Tacoma will be up tonight for Pomeroy.

The Virginia will be down tonight from Pittsburgh.

The Florence Marmet is laid up at Point Pleasant.

The Val P. Collins is laid up in the Kanawha river waiting for orders.

Packets expect to carry lots of Kentucky home-comers this summer.

The Island Queen leaves Cincinnati this week for Cairo. She will fill engagements for excursions at intermediate towns along the river.

The Catherine Davis, which has been in charge of a dredging craft, is laid up at Huntington, where she is employed in shaping the harbor and landings for a new coal company which is to invade the local field.

In anticipation of the increased river trade the coming season, several of the boats plying in this trade will have their sleeping quarters enlarged up to the Government allowance. This will mean that many more passengers than usual can be accommodated.

Now is the time to take Hollister's Rocky Mountain Tea. It cleans your system of all impurities. A wonderful spring tonic. A family benefactor. 35 cents. Tea or Tablets. J. Jas. Wood & Son.

Changes in English.
The English is a living language, and is bound to change both in spelling and grammar. There was a time when the split infinitive was more widely accepted than it is to-day and the double quadruple negative was in good repute. There was also a time when spelling was so different from present usage as to be nearly unintelligible now—which caused Artemus Ward's witty remark that Chaucer may have been a great poet, but he could not spell. As long as a language is alive change is its order, as it is with any living thing—change is life. — Indianapolis News.

No Advantage in Showing Wealth.
Mrs. Trotter—You'd better get the clerk to put your money in the safe, John. One never knows what may happen in these hotels.
Mr. Trotter—Great Scott, Mary! I don't want the clerk to know I have all this money. He hasn't made out my bill yet.—Browning's Magazine

New Industry.
Knicker—What is Smith's business?
Bocker—He manufactures second-hand automobiles.—N. Y. Sun.

Billion of Nickels.
More than one billion passengers were carried on the surface, elevated and subway roads of Greater New York last year. The exact number of paid fares was 1,171,151,698, an increase of 93,493,451. Of these fewer than a quarter were transferred. The increase in transfers fell far below the increase in paid fares, which is somewhat accounted for by the increased evasion of the free-transfer law by the transportation companies. On the basis of total car mileage there were six passengers paying a five-cent fare for every mile that a car traveled. Increase in car mileage about kept pace with the increase in passengers, showing that the cars are now crowded to the limit of traffic.—N. Y. World.

Surf Birds Travel Far.
That birds of the family termed surf birds in the Hawaiian Islands should leave that paradise of the Pacific to go and rear their young in the tundras of Alaska would seem to many an extraordinary proceeding. Yet the turnstone and the black-bellied plover and the Pacific golden plover make the long journey of about 4,000 miles thither annually.

DANGEROUS SHOW ANIMALS

Most Fickle and Dangerous Among Them Is the Intelligent Elephant.
The terrible attack upon a woman recently made by a lion in a London music hall recalls the fact that a still more dangerous show animal is the elephant. A bull elephant is one of the most fickle creatures known. He is good-natured and submissive one moment, and the next his keeper is simply a mass of pulp!

"An elephant," said an expert keeper, "is twice as dangerous as a lion, a tiger or a bear. Those animals have to be watched very carefully when one is with them in their cages, but the tension of watching is only a few minutes at a time. An elephant, on the other hand, is allowed more freedom, and as one cannot be on the alert all day long, he gets his chance when he wants it. He often fiercely resents even a mild joke.

"We elephant keepers grow faint after a few years of the work. We expect to be seized and trampled to death some day, but live in hopes that it may not be soon. The great danger is when an elephant is just turning into a rogue. All elephants turn rogues sooner or later, and they never recover. The female elephants turn rogues earlier, and are more violent than the males, and the females are more dangerous in ordinary times, too.

"A good elephant trained can command a big salary. I know one who has been receiving \$125 a week for 11 years. Mere keepers, however, are poorly paid."

DIDN'T FIGHT WITH THEM.

Yanks Didn't Use Poppuns, So the Johnnies Didn't Whip Them.

Representative W. Bourke Cockran was delivering an impassioned speech against the policy of increasing the navy, relates Success Magazine, when he declared with vigorous gesture that the people of Greater New York have no fear of being destroyed by a foreign foe. "The American spirit and courage in New York is so great," Mr. Speaker, that our people would repel a foreign foe with the cobblestones from the streets before they would surrender," finished Mr. Cockran.

Jorn Sharp Williams, of Mississippi, who was sitting near, remarked to those around him:

"That reminds me of an old blowhard we had down our way. When war was declared he told his neighbors at the corner store that we could whip the Yankees with popguns. When the war was over, that same old fellow, who did so much bragging, was trying to explain the terrible result. Some one spoke up and remarked: 'I thought you said before the war that we could whip the Yankees with popguns.' 'I know I did,' replied the old fellow, with ready wit, 'but the Yanks didn't fight us with popguns.'"

IS A CANADIAN PARADISE.

Beauties of "The Lake of Deep Waters" with Its Myriad Islands.

Temagami is shaped like an octopus, with long stretched-out arms, and its shores are indented with deep circling bays, island strewn and culminating in sharp points and curves that add to the beauty of this magical scene. "The lake of deep waters" is the meaning of the Indian word, and they lie deep and cool in their bed of granite; to stillness a perfect mirror, in storm darkly menacing, with foamed waves showing fang-like teeth, writes Kato Westlake Velgh, in Four-Track News.

Being 100 square miles in area, Temagami forms one of Canada's great natural reservoirs. Mighty rivers from the height of land to the north flow into it, and it in turn feeds the streams that flow southward, carrying their life-giving waters through the forests to the people lands below. There are 1,400 islands in the lake, and the government has included the whole area in a magnificent forest reserve of a million and a half acres.

Old-Fashioned Morals Needed.

A number of people are proposing Woodrow Wilson, president of Princeton university, for the Democratic nomination for president of the United States in 1908. Dr. Wilson has already written his platform. It consists of one sentence, and yet covers nearly the whole field. It was contained in a recent address delivered by the Princeton president. It proposes as a solution for our economic problems the application "of old-fashioned morals to new-fashioned business." That's the whole thing in a nutshell.—Wall Street Journal.

Sailors Becoming Too Delicate.

The rising generation looks with horror upon the "roughing it" process at sea, which, a quarter of a century ago, was regarded by most boys as an absolute attraction. The twentieth century boy must have his comforts. What will the skipper of 12 or 15 years hence be like? We have a vision of a neurotic, delicate, gruel and muffer individual, who will be able to navigate his ship well enough in fair weather, but who, in times of stress, will require the assistance of a trained nurse.—Syren and Shipping.

Pre-Natal Influence.

"I wonder why those children have such awfully long faces?" said the visitor at the school.
"They were all born in flats," explained the teacher, "and knew they weren't wanted."—Detroit Free Press.

WHY HE COULDN'T SIT DOWN

Physical Impossibility with His Nether Limbs Clothed as They Were.
"I beg your pardon, but I'm in trouble," said a man who was well dressed and plainly excited to Sergeant Temperly at No. 3 police station, Armourdale, relates the Kansas City Journal. "Can you help me out?"

"I'll do my best," answered the obliging sergeant. "Sit down and tell me about it."

"No, I simply can't sit down," said the man, nervously.

"Must be serious to affect you like that," said the sergeant. "What is it?"

"You see, it is this way," said the man. "I came in on an early train from the west; and as I got up late, when the train was but a few minutes from the Union depot, I dressed in all haste. I had some business to attend to in Armourdale right away, and I paid my street car fare from some change I had in my overcoat pocket. But when I was standing at the corner of Fifth and Kansas a moment ago, for the first time I unbuttoned my overcoat and looked inside, and found—"

"That you had been robbed while on the train?" broke in the sergeant, interestedly.

"No," said the man, "I found that I had put my trousers on backward, and I can't sit down. What I want is a private place to change 'em."

He got it.

SWEDISH SPIES IN NORWAY

Sent for the Purpose of Reporting on Work in Military Quarters.

A spy, who is reported by the authorities to be a Swede, had been detected in Fredrikshald, where he was particularly interested in Fredriksten and Hjelmskollen. At the latter place he was seen by a guard, who recognized him as a man who had been hanging around the fortifications at Kongsvaer last winter. When he was discovered he made his way to Swedish territory. The guard was instructed to keep watch of the man. Late at night he appeared again in Norwegian territory and was met by the guard. When they separated the guard took the footpath to Hjelmskollen and was not surprised to meet the spy again. The latter then disappeared.

The Swedes allege that Norway is preparing to erect a number of fortifications along Glommen, outside of the neutral zone established by the Karlstad treaty, and to replace the fortified points which were dismantled in accordance with the treaty. The Swedes declared that these plans show a distrust of Sweden and are uncalled for when no preparations of a similar nature are being made on the Swedish side of the border.

WOULDN'T ROB THE BISHOP

Pacific Coast Bandit Returned Valuables Taken from the Cleric.

"Not a great while ago there was as bold a bandit as ever bade men stand and deliver operating between Fairbanks and the mines tributary to that town," B. B. McGinn of Alaska, according to the Washington Post.

"This modern Dick Turpin, one Hendrickson by name, kept up his robberies for months and made many a good haul. He was a courteous brigand and not altogether mercenary.

"On one occasion Bishop Rowe of Alaska was confronted by Hendrickson and relieved of all his valuables. As the good man was about to depart the robber, noticing his garb, asked him if he were not a minister of the Gospel. 'Yes,' said the victim, 'I am Bishop Rowe.' 'Well, then,' replied Hendrickson, 'I can't think of despoiling you. I used to be a member of your church, and however bad I may be, I can't rob you.' With that he returned to the bishop all his property.

"A little while later Hendrickson was captured by the United States authorities, and is now in jail at Fairbanks."

Alarm Clock for Drinkers.

A pretty little device of the wicked which is attracting a good deal of attention in restaurants, cabarets, posadas, cafes and hospices these days is called the "jag indicator." It was invented for the benefit of good fellows who do not know when they have had enough to drink. It is a green frog, with pink specks upon its body, and is about three-quarters of an inch long. The customer receives one from the barman, which he is asked to put in his pocket and to place upon the bar before each subsequent drink. After a drink Mr. Crapaud is returned to the pocket. As soon as the customer sees upon the bar more than one frog, or thinks he sees the frog move, he is expected—nay, required—to quit drinking for the day.—N. Y. Press.

The Bodleian Library.

The Bodleian library, which was established in 1445, takes its name from Sir Thomas Bodley, who reestablished the library in 1597-1602, and presented it to the University of Oxford. It contains more than 500,000 printed volumes, 30,000 volumes of manuscripts, a great many first editions and early printings, and collections of coins and pictures.

"Blind Tiger" in a Church.

The Methodist pastor in the "dry" town of Waverly, Tenn., assisted the police to locate a "blind tiger" and was surprised to find that the illegal gin mill was in the church basement and conducted by two of the apparently most devout members of his congregation, a doctor and a justice of the peace.

THE ROBIN AS A RUNNER.

Question of Curious Subscriber Answered by the Obliging Editor.

"I saw a freak in birdology as I was coming from my house to my office, and called the attention of two others to it who were standing near by. There were several robins running about in the yard adjoining my lot, and among them was one with a white head and neck. Will the president of the Audubon society please tell us how to account for it?"

Pending Mr. Pearson's explanation, says the Charlotte News and Observer, we would suggest that a robin never runs, since he can use one leg only synchronously with the other, and both have to go the same way at once. It is a funny thing about a robin's legs, but they are dependent to a degree. Perhaps the robin ran because he was white-headed. Now, why he is white-headed is another question. The principle of the albion characteristics of heads that once were black and now are white has never been solved except by those concerns which advertise to make white heads black—and they won't tell.

But if this robin has learned how to run, he is the oldest in the flock certainly. We put it down to old age at a hazard.

LAUGHTER AND DIGESTION.

It Has Been Shown That Mirthfulness Stimulates Gastric Secretion.

Nothing will take the place of good cheer and laughter at meals or any other time in the home. There is a vital connection between amiability and digestion—between good cheer and assimilation, writes Orison Sweet Marden, in Success Magazine. Laughter is the best friend the liver has, and depression, or melancholia, its worst enemy. Numerous experiments have shown that mirth and cheerfulness stimulate the secretion of the gastric juices, and are powerful aids to digestion. Yet, knowing this, many of us sit as gloomy and absorbed at the table as at a funeral. In many homes, scarcely a word is spoken at meals, outside of requests for an article of food.

The meal hour ought to mean something besides supplying a mere animal function. The bell which calls the family to the table ought to be the signal for a good time generally, when all cares should be thrown off and everybody appear at his best. It ought to signalize the time for mirth and laughter. It ought to be looked forward to by the members of the family as the recess or nooning is looked forward to by pupils in school, as a let-up from the strenuous life.

SOMETHING ABOUT ECLIPSES

Not the Same in Manifestation as They Were in Former Days.

Eclipses are not what they used to be. The eclipse, with its accompanying phenomena, was observed a generation ago as the manifestation of certain effects of heat and light, but far more complex is the vision of the investigator of to-day. Prof. T. T. Thomson and the Cavendish school have placed the electro-magnetic theories of matter and of radiation on the firmest of bases. We now think of a body which, like the sun, radiates energy, as sending out not heat and light but corpuscles, electrons of almost popular notoriety, positive and negative ions, and rays and emanations of such varied types and complexities that elucidation and definition still await them.

Then, too, M. Lebedet and Messrs. Nichols and Hall have confirmed the theory of the pressure exerted by light. Consequently we cannot now look at the corona as a simple glow—it must be viewed as the complex expressions of light exerted on particles within its ethereal territory, of the action and interaction of pulsating carriers of composite electricity and matter.

Imported Irish Sod.

On the very rare occasions that snakes have been found in Ireland explanation of the phenomena has always been forthcoming. One was brought in a bundle of shrubs, another in a packing case, and yet another—in this time a dead one—was introduced by an English visitor. All have proved of alien extraction. Even science cannot disprove the Irish belief in St. Patrick as a Pled Piper. Here is an incident illustrative of this belief: A son of Erin emigrated to Australia, and quickly made a fortune. He was happy except for one trial—snakes. "Oh, for an Australian St. Patrick!" he moaned. And then came an inspiration—he wired for a load of the soil of old Ireland. Only when he had strewed the precious mold about his dwelling could he sleep in peace.—London Tribune.

Where Londoners Were Born.

Light is thrown upon the subject of ancestral Londoners in the latest volume of the report of the London traffic commission. From one of these we learn that of the 4,500,000 people in the administrative county of London only 3,000,000 were born in it. But that is probably a larger proportion than most people were aware of.

Good Sign.

"I guess I must be getting old and ugly," sighed the pretty girl at the flower stand.
"What's the matter?" asked the public stenographer.
"Nowadays all the men count their change."—Cleveland Leader.

STRENGTH OF OPEN SKY.

The Great Things of Earth Are Concealed in the Free Out-of-Doors.

What great deed was ever done indoors? What great thing of the earth in art, in science, in romance was ever conceived and brought forth within walls? Paths grow there, and small tragedy, and bitterness and pessimism; but not great tragedy, nor the vast and useful pessimism which uplifts human nature and humanity, writes Emerson though, in the Reader. The joyous, hopeful, optimistic things, the large and cheerful motives, are found beneath the sky. The Indians say that the babe born in the wind will be chief, and that might well be so. What strong blood ever grew indoors? What great drama of the ages was ever played there? What duel on the stair ever equalled the battle under the trees? Science may delve, lamp wise; but what great things even of science came wholly from within walls? Electricity, navigation by the stars—the things which have really conquered the world—did these appear to man as he studied at some table side? No, the great and sweet things of knowledge came from the naked stars. Guilty and troublous wisdom may have housing, concealment, and so make confession that it is evil; but before guilty Eden knowledge was out of doors.

ENGLISH AS A CLASSIC.

Study of the Language Is Now Prevalent in American Colleges.

A generation ago the education of a college man confined itself almost entirely to a study of Latin, Greek, philosophy and metaphysics, while now the study of history, economics and other subjects of practical bearing predominates, says President Schurman, as reported in the Cornell Sun. Interest in the classical languages has now largely abated, even with persons who make a study of them. The student was formerly supposed to get his training from Greek and Latin; English he studied incidentally. Now the study of English is predominant in the American colleges. This should not be considered, however, as a disparagement of the progress of American culture; it should be remembered that the Greeks themselves wrought out their wonderful culture, literature and art entirely without the aid of a foreign language. The schoolboys of Greece were required to commit to memory the best poems of the language—notably the poems of Homer—which shaped their thoughts, conversation and acts, and finally their character.

POSTAGE STAMP TONGUE.

Disorder Resulting from the Unclean Habit of Licking the Stamps.

"A number of ailments, some of them extremely dangerous, are comprised under the general head of postage-stamp tongue," said a physician. "Postage-stamp tongue, in a word, is any disorder contracted from the licking of postage stamps.

"Three or four persons a week visit me with postage-stamp tongues. They have a throat trouble, or a skin disease, or a pulmonary complaint, brought on by the reckless habit of stamp licking.

"A stamp should never be licked, as its gummed surface is always squirmy and pulsating with germs. If any licking is to be done, let it be applied to the right-hand corner of the envelope, where the stamp goes, for there the germs are apt to be sparse.

"To be safe, though, the tongue should never be applied to either envelope or stamp. A damp sponge should be used in the tongue's stead."

Bird Cages Noah's Ark

It has been said that the way to advertise "is to advertise." This I have found to be a true saying. A recent insertion in our papers of a picture of a man supposed to represent myself has called forth a great many expressions, such as the following: "What are you doing with those bird cages in your hands?" "That is the best advertisement you have gotten out since you have been in the business." "Where did you get the Noah's Ark?" "Your eternal advertising has gotten me into trouble, and I am buying this house in order that I may have some peace of mind." "I should think that you are very tired carrying those houses around with you." "What kind of birds have you in the cages?" "Is that a rat-trap?" All of which goes to prove that the best way to advertise is to advertise. Now, let us be serious. Recently disappointment has come to a number of people who were just keeping quiet and saying nothing with reference to some property which they really wished to buy, when the other fellow came in and bought the property. The best thing for you to do, if you have something in mind that you want to buy, is to buy it without delay. I have offices conveniently located where your business can be strictly private. If you want to buy or sell do not hesitate to come to me and make your wishes known.

Yours very truly,

Jno. Duley

215 Court Street.

STREET PAVING ORDINANCE.

Be it ordained by the Board of Council of the City of Mayville, as follows:

Section 1. That the following streets and parts of streets in the City of Mayville, Kentucky, be improved by original construction, by paving and curbing the same, with vitrified brick and curbing and gutter suitable for the purpose, from the inner line of curbing on the outer sides of the pavements thereon for sidewalks, but so as to include the curbing on both sides of said streets and between the lines thereof, as follows:

Second street from the west margin of Wall street to the east margin of Market street.

Third street from the west margin of Wall street to the east margin of Bridge street.

Section 2. That the same be paved and curbed in accordance with the following plans and specifications:

SPECIFICATIONS FOR STREET GRADING AND PAVING IN THE CITY OF MAYVILLE, MASON COUNTY, KENTUCKY.

1. The work shall consist in the furnishing of all materials, labor, tools and machinery necessary to the proper prosecution and complete construction of a hard burned vitrified brick pavement, a curbstone and a proper drainage system on streets named herein. The work to include all grading, preparation of sub-grade and foundation, tiling, inlets and sewer connections, and all work of whatsoever kind necessary to complete this improvement, all as more fully specified below and shown in the plans for this work.

2. All work will be done under the direction and supervision of the Engineer and to the satisfaction of the Council or the Paving Committee; and the words Council and Engineer shall be held to mean the said Council or its Committee, and the Engineer or his duly authorized agent.

3. The word Contractor in these specifications shall be held to mean any contractor or firm of contractors, or any member of a firm contracting for any of this work, or his or their agent or agents, one whom shall be upon the work at all times during its progress.

4. The work will be started out by the Engineer, and the Contractor shall carefully preserve all stakes or monuments of every kind.

5. The Engineer and Council shall have full power to condemn any work or material not in accordance with the specifications, and to require the Contractor to at once remove the same. The Contractor must also furnish at his own expense such labor as may be deemed necessary by the Engineer to assist in cutting and inspecting material. All refuse materials shall at once be removed from the street.

6. In all questions as to the meaning and intent of these specifications, the decision of the Engineer shall be final.

7. The Engineer and Council may, if they deem best, make alterations or modifications of the specifications or plans for this work. The price to be paid for this work under such altered or modified specifications to be agreed upon in writing and signed by the Contractor and some one authorized by the Council on behalf of the City of Mayville.

8. And it is expressly agreed that such alterations shall not annul or violate his contract; and the Contractor hereby agrees not to claim or bring suit for any damages, whether for loss of profits or otherwise, on account of not being allowed to do such work or furnish materials.

Whenever any additional work or change or modifications in the work contracted for is agreed upon as above, such additional work, alteration or modification shall be upon and subject to all the provisions of the original contract.

9. The Paving Committee and Engineer may suspend the work in certain places, or altogether, if in their opinion public needs require it; such suspension however shall not exceed one week at any one time, except that whenever in his opinion the weather is unsuitable he may cause the work to be suspended during such time as the weather may remain unsuitable. In case of any such suspension, the time for the completion of the work under this contract shall be extended by as many days as the same was suspended, but no allowance of any kind other than such extension of time will be made.

10. In case of any injunction or other process restraining the City from proceeding with the work, the contract may be suspended or abandoned by the Council. If the work is suspended the Contractor's time for completion shall be extended as many days as the same was suspended. If the contract is abandoned, payment for all work to such date of abandonment shall be made forthwith; and the said Contractor shall not hold the City of Mayville, Kentucky, liable for any damages whatsoever on account of any such suspension or abandonment.

11. The right to lay any water pipes, to construct any sewer or sewers, receiving basins, culverts or inlets, or to make house connections with sewers or water pipes, or to grant any such rights and privileges to others at any time prior to the completion of the pavement, is expressly reserved to the Council. In any such case the Contractor shall not be entitled to any damages either for the digging up of the street or for any delay caused thereby; but he shall be allowed for any work or material made necessary on his part, such sum (not exceeding contract rate) as may be agreed upon between him and the Engineer; and his time for completion shall be extended by as many days as he was delayed.

12. All materials delivered on the street shall be neatly and compactly piled so as not to impede travel on the sidewalks nor the use of fire plugs, nor damage any tree, awning or other improvement. All rubbish or refuse shall be immediately removed by the Contractor. In case of suspension of the work, the Contractor shall immediately collect and pile all materials as above specified.

13. All curbing, cross-walks, drain-tile or other material of whatever kind taken up by the Contractor, shall be considered the property of the City (except such materials as have been laid by the property holders, which shall belong to such owner); and the Contractor shall use care in handling and shall carefully pile same at such points as may be directed by the Engineer.

The work shall be begun at such points as the Council may designate; and not more than three adjoining squares in length may be torn up at one time, nor shall any square be blocked out where the Contractor is actually

working. All bricks necessary to complete any square or section to be torn up at one time shall be on the ground before the work is commenced or satisfactory guarantee given that the material will be forthcoming and will cause no delay to the work. The Contractor will keep the excavation clear of all water at his own expense.

15. The Contractor shall erect strong barricades and place red lights at night whenever necessary, and hereby agree to hold the City harmless for any and all claims for damages resulting from any failure or neglect on the part of the Contractor, or his employees, to properly comply with the requirements of this section.

16. Each square as soon as the pavement is completed shall be thrown open to public use; but such opening and using shall not be considered as an acceptance of any part of the work.

17. If the Contractor fails to complete the work within the time named in the contract, he shall forfeit to the City of Mayville, Kentucky, the sum of five dollars per day by way of liquidated damages.

18. But if in the opinion of the Engineer and Paving Committee the work is not being prosecuted in such manner as to insure its completion in the time and in the manner herein described, then, in either case the Engineer shall notify the Contractor and his bondsmen by mail to their ordinary address of such failure; and the Paving Committee, shall have the right to annul and determine the contract and to take possession of the work; and is hereby authorized to put on sufficient force of men and teams to insure its proper completion, or may relet the work. And in either case all cost made and expended shall be charged to said Contractor; and if the sum so charged shall exceed the amount due said Contractor under his contract, then he shall become liable to the City for any sum that the cost of doing said work shall exceed the sum due the Contractor upon the completion of the work as contract and bond.

19. The Contractor shall, without additional compensation, make good any settlement or derangement of the roadway, foundation, cubs, sewers, inlets, manholes, gutters, or any part of the work done under this contract, and shall replace acceptably any soft or inferior bricks, which may be condemned by the Engineer within six months after the acceptance of the work. (See Section 2.)

20. All work shall be paid for at the contract prices, unless by agreement between the Contractor and Council, and no extra or customary measurements will be allowed in measuring the work; only the actual length, area, solid contents or number will be considered.

21. Estimates will be made on the Saturday preceding the first regular monthly meeting of the Council, and the amount of work done, less ten per cent., will be certified to the Council for payment, but such payment shall not be construed as an acceptance of any part of the work.

22. Five (5) per cent. of the total cost of the improvement will be retained out of the final estimate of the work for a period of twelve months to secure the repairs required made by the Contractor. And should the Contractor neglect or refuse to make any needed repairs for five days after being notified to make such necessary repairs by the Engineer or Paving Committee, said Engineer or Committee may cause such repairs to be made and pay for the same out of the money hereby retained. At the expiration of twelve months from the acceptance of the work, and the improvement being in all its parts in such condition as the Council shall approve, all money hereby retained and not expended as above stipulated, shall be paid to the Contractor and he shall be released from further care of the work.

23. The work to be begun within ten days after the signing of the contracts, and to be prosecuted so as to secure its completion in 120 days from such date.

24. The Contractor shall satisfy the Council by proper receipts from all parties furnishing material and performing labor, showing that they have been paid before he shall be entitled to receive contract price in full.

25. The Contractor hereby further agrees that he will not assign or sublet this work without the consent of the Engineer and Council.

26. The Contractor assumes all risks of variance in any computations or statements of quantities or amount mentioned in the estimates or contracts connected herewith or of the plans.

27. Any loss or damage arising out of the nature of the work to be done under these specifications, or from any unforeseen obstruction or difficulties, legal or otherwise, which may be encountered in the prosecution of the work, or from the action of the elements, shall be sustained by the Contractor.

28. The improvement will be drained to the ditches, gutters and sewers, inlets and lines of drain tile, and also by the laid tile below the sub-grade. The inlets will be approved pattern, substantially set in brick work, and will be connected with the manholes by lines of ten or twelve-inch sewer pipe with increasers, elbows, P traps, or other necessary shapes. The drain or farmers tile shall be four inches in diameter, hard burned, laid true to line and grade, not less than eighteen inches below sub-grade, and shall be connected with the drainage system with one joint or vitrified pipe, or as directed by the Engineer, after which the trench will be refilled with crushed limestone, and tamped thoroughly, as specified in section 35. Drain tile shall be used only at such places as the Engineer shall direct.

29. Manholes will be built where shown on the plans. They will be made of good hard brick laid in cement mortar; walls will be nine inches thick as shown on plan, and the foundation will extend four inches below the grade line of the sewers. Foundation will be made of hard burned brick laid in cement mortar and grouted, or of concrete, as deemed best. Header courses shall be laid every fifth course. Care will be taken to have manholes and sewers properly connected, as shown on plan, so as to hinder the flow the least possible. They shall be nicely pointed inside and plastered outside with a half-inch thickness of good cement mortar. Five-eighth-inch round wrought iron steps of ten-inch tread, one inch clinch back of wall and fifteen inches apart to be built in all manholes. Top will be finished with cast iron rings weighing not less than two hundred and forty pounds and covers not less than one hundred and twenty pounds.

30. All cement mortar, if not otherwise specified, shall be made of approved qual-

ity fresh American Portland Cement and clean sharp sand in equal parts, determined by measure. The cement and sand shall be thoroughly mixed dry, and water added to form a paste of proper consistency. All mortar shall be fresh for the work in hand. No mortar that has begun to set shall be used.

31. None but the best quality of sound well shaped bricks, burned hard entirely through, shall be used in setting inlets or in any other brick work, except that for ten per cent. good bats may be used in manholes. All bricks must be wetted by immersion immediately before being laid.

32. All concrete found necessary shall be made of one measure of cement, two measures sand, and five measures crushed limestone, to be thoroughly shoveled mixed dry, turned over twice on mixing platform, then water enough added to moisten the same, to be piled in conical-shaped pile and again shoveled turned; all to be done under the instruction and to the satisfaction of the Engineer.

33. The excavations for drains, inlets, manholes and other fixtures shall be so made as to have six inches of clear space outside of the pipe or other structure, and to require grade and depth. All bracing, sheathing or shoring required must be done by the Contractor.

34. In refilling trenches, or about any structure, the earth or other filling material to be so placed as not to disturb the work in any way, and shall be deposited in layers not exceeding eight inches in thickness, and thoroughly rammed until the filled earth is as compact and solid as the original earth. There shall be at least two men tamping with heavy rammers for each shoveler.

35. The Contractor will remove all old or condemned material, rubbish, trees, logs, water, fill or refuse, posts, horse blocks, crossings and any and all obstructions of whatsoever kind that may be encountered in the execution of this work at his own expense, and without any extra charge whatever, and shall deposit same as directed by the Engineer and in accordance with Section 13.

36-37. The earth foundation or sub-grade will be brought to an even surface parallel with the grade proposed for the pavement by making the necessary excavation or embankment. The stone, cinder, gravel or other suitable material will be carefully removed so as to keep it free from clay, dirt or other rubbish, and deposited and leveled at such points and in such manner as the Engineer and Council shall direct. All excavated material unfit for foundation will be placed in low ground, alleys, lots or wherever the Engineer and Council shall direct. Material to be properly leveled as dumped. When lots are filled, those assessed for cost of the improvement shall have the preference. No extra haul allowed under three-quarters of a mile. Soft or spongy earth or other material not affording a firm foundation will be removed and the space refilled with gravel or broken stone and solidified by ramming or rolling. This sub-grade shall be compacted by thoroughly rolling with a roller weighing not less than eight tons; any portion of the sub-grade not accessible to the roller shall be thoroughly compacted by hand ramming, all to the entire satisfaction of the Engineer. Particular care will be observed in the preparation of the sub-grade. When the rolling and ramming shall have been done the surface of the sub-grade shall be true to the grade and crown, and ten inches plus the depth of the brick to be used below the proposed finished surface of the pavement. Careless or unnecessary injury to pipes, drains or fixtures of any kind will be repaired at the expense of the Contractor and the cost deducted from any moneys due him.

38. The combined curb and gutter shall be constructed upon an eight (8) inch foundation of broken stone, gravel or boiler cinders, and shall consist of a curb six (6) inches wide; at summits, street corners and entrances the height will be fixed as the Engineer directs. The gutter will be sixteen (16) inches wide and six (6) inches deep, so constructed that the curb and gutter shall be monolithic.

Stone, gravel or boiler cinders for foundation shall be broken or passed in every way a three (3) inch ring, and must be of approved quality; free from dust and dirt or other foreign matter. Stone for concrete shall be a good durable limestone, furnace slag or gravel of approved quality, of a size to pass in every way a one and one-half (1 1/2) inch ring, and must be clean and free from dust, dirt or other objectionable matter.

Sand for concrete shall be Ohio River or pit sand; clean, free from clay and loam or other objectionable matter. For finishing coat sand must be clean sand, crushed quartz, granite or sandstone of approved quality. The cement shall be of the very best quality of American Portland Cement, equal to the Atlas and subject to the approval of the Engineer. The water shall be fresh and clean, free from earth, dirt or sewerage. The sub-grade shall be excavated six (6) inches beyond each side of the finished curb and gutter to the proper depth and must be evenly and smoothly dressed with a rise toward the street center on one (1) inch in sixteen (16) inches. Any soft or spongy places must be excavated and filled with a suitable material and well rammed. Directly under the curb and in an especially excavated trench three (3) inches below sub-grade will be laid three (3) inch laid tile. The tile must be straight and true in diameter, neatly laid to line and grade in a workmanlike manner so as to insure thorough drainage. The tile will be connected to inlet or catch basin. Upon the sub-grade thus prepared will be laid the stone, gravel or boiler cinder eight (8) inches deep, which shall be tamped with water and thoroughly tamped. The concrete shall consist of one (1) part of volume of the above mentioned Portland cement, two (2) parts of sand, and five parts broken limestone, gravel or slag. The cement and sand in the specified proportion will be thoroughly mixed dry on a tight board platform or in a box, until no streaks of cement or sand are visible. The proper quantity of limestone, gravel or slag will then be added, and the whole turned with shovels while the water is being applied by sprinkling until every piece of stone or pebble is completely covered with a coating of mortar. The surface against which the concrete is to be laid shall be thoroughly cleaned and dampened by sprinkling with water just previous to placing the concrete. The concrete shall be evenly spread upon the foundation as soon as mixed in layers of such depth, that after being thoroughly compacted, with ramming of an approved pattern, it shall not be in any place less than four and one-half (4 1/2) inches thick, and the upper surface parallel with the surface of the completed gutter. The concrete for the

curb shall be laid in a like manner four and one-half (4 1/2) inches thick and with one and one-half (1 1/2) inches of the top and face of curb line. The finishing coat shall be put on the gutter before the curb is laid up, the space for the finishing coat on face of curb shall be made by a board one and one-half (1 1/2) inches thick, which shall be removed when ready to apply the finishing coat, and concrete and finishing coat of curb tamped together.

The sides of the batches shall not be larger than is required for immediate use, and no retempering of concrete or mortar will be permitted. Any concrete or mortar that has been mixed more than one-half (1/2) hour will be rejected. All volume shall be measured (not estimated) for each batch of concrete and mortar.

The finishing coat shall be composed of one (1) volume of the above mentioned Portland cement and one and one-half (1 1/2) volume of the aforementioned sand, crushed quartz, granite or limestone, thoroughly mixed dry and then made into a mortar by turning with shovels as water is added by sprinkling, until a homogeneous mass is produced. The mortar while fresh will be spread upon the concrete base before the latter has reached its first set. In such quantities that after being thoroughly manipulated and spread over the concrete it will make a layer of one and one-half (1 1/2) inches thick, conforming to the required grade and cross section.

The curb and gutter will be constructed in blocks approximating six (6) feet in length and cut entirely through at each joint, the joints being filled with dry sand. The curb and gutter will be kept moist by sprinkling, and projected from the elements and travel until it is set. Entrances from adjoining streets and alleys, or to public and private residences, will be built as directed by the Engineer. Circular openings in the curb for down spouts and drainage will be directed by the Engineer. The name or number of each cross walk will be sunk with three-inch letters sunk 3-8 inches deep.

The complete curb and gutter shall be of the design on file in the Engineer's office, with angles on the face of curb rounded to a radius of one (1) to one and one-half (1 1/2) inches, the gutter having a slope of one (1) inch in sixteen (16) inches, unless otherwise directed by the Engineer. Concrete or mortar that fails to set or show a proper bond after, in the opinion of the Engineer, having been allowed a sufficient time, shall be taken up and replaced with new concrete or mortar of proper quality by the Contractor.

The space back of the curb to within four (4) inches of the top of the curb must be filled with broken stone, gravel or cinder.

Where walks join the curb they must be connected to it in a neat, substantial manner, the contractor furnishing new material where necessary. Where walks do not join curb, the ground shall be neatly graded and sloped from the walk to the curb. All surplus or left over material, and all debris incident to construction of the curb and gutter shall be removed and disposed of by the Contractor.

If at any time during the guarantee period any cracks, scales or other defects appear in the curb and gutter, due to the faulty material or workmanship, the block or section in which such defect appears shall be taken up and re-laid with new material according to these specifications by the Contractor.

39. Upon the sub-grade prepared in accordance with section 37 for grading, will be laid a concrete foundation six (6) inches thick after being thoroughly compacted.

The concrete shall be composed of one part, by bulk, of an approved Portland cement, and six parts crushed limestone.

The Contractor may clean and crush the limestone, taken from the present road surface, for making the concrete, but the material must be clean and suitable for the purpose or the same will be rejected.

The proportion of materials for concrete must be determined by actual measurement as the same is mixed.

The material must be turned twice while dry and twice wet, and must be raked constantly as it is turned. If made by hand.

The use of a suitable concrete mixer will be preferred for this work. The concrete thus prepared must have a consistency that when rammed in a mass it must not shrink like jelly, but will when struck compact within the area of the face of hammer without displacing the material laterally. The concrete thus prepared must be immediately placed in the work and thoroughly compacted by ramming until free mortar appears upon the surface.

The whole operation of mixing and laying each batch of concrete shall be performed in a prompt and skillful manner and must be entirely completed before the cement has begun to set will be reject.

The upper surface of the concrete must be made to exactly conform to the cross section of the finished pavement and shall be no more than six (6) inches less than five (5) inches below it. The concrete must be made perfectly smooth by brushing with wire brooms.

As soon as laid, and before the top becomes dry, the entire surface of the foundation must be covered with one (1) inch of clean sand, to protect it from the sun and wind, and if required shall be kept wet until thoroughly set.

No driving will be allowed on the concrete until it has set, and it must be allowed to set for four (4) days before the pavement is laid thereon.

Any damage done to the foundation by passing over it will be repaired by the Contractor without extra pay.

The material used for concrete must be crushed limestone, broken and selected so that none of the particles shall be larger than cubes of 2 1/2 inches, and there shall be enough fine limestone and sand to fill all voids in the concrete when settled in place.

40. The foundation thus prepared shall be covered with two inches of clean sharp sand and brought to a proper crown by the use of a scraper or template of such design and construction as the Engineer may approve.

41. Upon the foundation so prepared is to be set a single layer of bricks or blocks, laid on edge end, and across the street at right angles to the curb, perpendicular to the grade of the street, and kept in even straight lines of courses except at street intersections, where the courses shall be at such angles as the Engineer may direct. None but whole bricks or blocks can be used, except in starting and closing courses at the curbs

two pieces for each course may be used. Before the closure is made each single course shall be pressed together as compactly as possible with proper lever applied at the curb end of the course which shall then be keyed in place with a close, tight fitting brick, all faces of which shall be cut at right angles to its tops and sides. The joints shall be broken by a lap of not less than three (3) inches. Every four or five courses of bricks or blocks must be compacted and courses straightened by blows of a sledge hammer on a wooden bar placed against the sides of bricks in last course laid, or by such means as the Engineer may approve.

At the beginning and termination of the improvement, and at the roadways of all intersected streets or alleys, a curbstone not less than four inches thick and 12 inches deep, and in sections not less than 3 feet long, shall be set in a trench sufficiently wide to allow 3 inches crushed limestone, cinder, sand or gravel under, and on each side of it.

This edging must be dressed and jointed, and fitted closely against the pavement, and securely backed up so as to hold it firmly in place. This will be made of stone, same as provided for stone curb.

42. The bricks for this work must be uniform in quality, of the best materials, and made in the best manner, made and burned especially for street paving. The structure of each brick shall be uniform throughout, free from laminations, and shall stand all such reasonable tests as to durability and fitness as apply to this paving material. Contractors will submit five or more specimen bricks with their bids, indicating the kind the bidder proposes using on the work, and shall be accompanied by a statement from the manufacturer of same to the effect that bricks equal in every way and respect to the said specimens, and sufficient in quantity to complete the work in the time specified, will be furnished to the bidder if the contract is awarded to him. The dimensions of brick must be the same throughout the work. The standard size may be not less than eight nor more than ten inches long; not less than four nor more than five inches deep; and not less than two and one-half nor more than three and one-half inches thick. They shall be true in form and rectangular in shape, except that the edges shall be rounded from one-quarter (1/4) to three-eighths (3/8) of an inch. The structure and texture of each brick shall be uniform throughout, and shall be so burned and annealed as to secure the maximum hardness and toughness.

Bricks that are brittle will be rejected; they must be vitrified. By vitrified is meant a perfect blending of the constituents in burning. These quality requirements, compactness, uniformity of texture, hardness, toughness, vitrification, etc., must extend uniformly through the whole interior of each brick, and when broken the bricks shall show no variation in structure or indications of lamination. Any cracks from drying, firing or other cause will be sufficient reason for rejection. Any bricks showing a water absorption exceeding three per cent. of their weight dry will be rejected. In this test bricks will be broken across the middle, thoroughly dried and immersed in water for seventy-two hours. All brick used in the pavement shall be equal in every respect to the specimens submitted with proposals. No brick known to have failed for any cause when laid in any other city will be accepted for this work.

43. The brick when set shall be thoroughly rammed two or more times as the Engineer shall direct. The ramming to be done with a paver's rammer weighing not less than twenty-five pounds either directly upon the bricks or under a flatter, as the Engineer shall direct. The ramming must not come nearer than ten (10) feet to the unfinished edge of the pavement, or such portions of the pavement as can be rolled will be thoroughly rolled with a roller weighing eight tons. When the bricks are thoroughly bedded, the surface of the pavement must be true for grade and crown.

The interstices of the brick shall be completely filled with "Hotter" Asphalt Filler, produced by the American Asphalt and Rubber Company, of Chicago, or equal thereto; the material shall be no less than 95 per cent. of pure asphaltic bitumen, composed of not less than 68.3 per cent. petroleum and 31.7 per cent. asphaltene (each having a specific gravity of not less than 0.90 and 1.13 respectively). It shall not contain any coal-tar products. The specific gravity of the Filler-compound shall be not less than 1.20; the melting point shall be not less than 210 degrees F., or by capillary tube tests, it shall not commence to melt below 195 degrees F. nor "run" below 215 degrees F. The Filler-compound to weigh not more than 7 1/2 to 8 pounds to the gallon and shall produce not less than 20 gallons to the ton; it shall remain ductile at all temperatures, shall be an absolute waterproofing; it shall firmly adhere to the brick and yet be pliable rather than rigid, thus proving for expansion and contraction and traffic conditions.

STREET RAILWAY.

The street railway track shall be composed of seven inch "T" rails, on the best quality of sawed white oak ties, six inches deep, seven inches wide and seven feet long. The sub-grade shall be excavated to a depth of nineteen (19) inches. The ties to be spaced two and one-half (2 1/2) feet center to center. The ties shall rest on a bed of concrete six inches thick and to be filled between and over and at the ends with concrete as shown on plan in Engineer's office. The concrete shall be of the same quality as for paving foundation. The price in the proposal shall cover excavating foundation, blocking up track, putting in concrete and completing the paving between tracks and one foot outside of each rail. The Street Railway Company to furnish rails, connection, spikes and ties, and lay ties and rail.

INSTRUCTION TO BIDDERS.

1. All bids must be made on the forms furnished by the Engineer. Each item must be bid upon. The bid must be sealed and directed to the Paving Committee in care of the Engineer.

2. All bids must be accompanied by a certificate of deposit for \$500, payable to the Treasurer of Mayville on demand, and must not contain any endorsement thereon other than the name of the bidder.

3. The bidder must exchange some certified checks with deposit as specified above. The certificate of deposit of the three lowest bidders will be held until contract and bond are executed and accepted by the Council. All other certificates will be returned immediately after the bids

have been computed, and the certificates of the three lowest bidders will be returned as soon as bond is executed.

3. The bond required of the successful bidder shall be twenty-five per cent. of the estimated cost of the improvement, and must be executed by an Indemnity Bonding Company, satisfactory to the Council.

4. The City of Mayville will consider it a reason for the rejection of bids, or bid, if any Contractor has failed in any other town to execute contract after work has been awarded to him, or if he has failed in the execution of any contract, or has a reputation of being engaged in litigation, or if his work has proven defective in any other city.

5. The quantities which will be exhibited at the office of the Engineer for the purpose of calculation and tabulation of bids to ascertain who has the lowest bid, will have no bearing, whatever, upon the final estimates.

6. The City specially reserve the right to reject bids or to take other than the lowest, if they esteem the same to be to the best interest of the city.

PROPOSAL.

Mayville, Ky., Street Construction, Mayville, Ky., 1906.

To the City of Mayville, Ky.

The undersigned, having carefully examined the plans, specifications and profiles on file in the office of the Mayor and City Clerk, for the original construction of Second street, from the west side of Wall street to the east side of Market street, and Third street from the west side of Wall street to the east side of Bridge street, proposes to furnish all the material in every respect equal to the samples filed herewith; and to do all the work necessary for the completion of this street construction within 120 days after signing of contract, and in strict accordance with the specifications attached hereto under the direction of the Paving Committee and their Engineer, at the following rates, viz:

Prices given for paving include all excavations, ballast and sand cushion.

Description of Material or Labor.	Prices to be written in figures.	Prices in Figures.
Brick per sq. yd.	DoL. Cts. DoL. Cts.	
Brick per sq. yd.		
Brick per sq. yd.		
Brick per sq. yd.		
Concrete curb and gutter, per lin.		
Foot		
Bandstone edging, straight, per lin.		
Foot		
Catch basins, complete		
Manholes, complete		
18 inch Tile sewers, per lin.		
15 inch Tile sewers, per lin.		
12 inch Tile sewers, per lin.		
10 inch Tile sewers, per lin.		
4 inch Agricultural Tile, per lin.		
3 inch Agricultural Tile, per lin.		
Extra limestone filling (crushed), per cubic yard		
Percentage above actual cost for unspecified work		

Note: Bidders.

This proposal must be accompanied by a Demand Certificate of Deposit of \$500 in a Bank doing business in Mason County, Kentucky.

Section 3. The construction of each of said streets, except as hereafter provided, shall be at the exclusive cost of the owner or owners of lots and parts of lots of land fronting or abutting or bordering thereon, which cost shall be apportioned by the Board of Council to said lots according to the number of front feet thereof abutting on said streets respectively.

The cost of paving the street intersections from curb to curb shall be borne by the City of Mayville and paid upon order of the Council and out of the levy of the year current with the completion of such work.

Section 4. That the accepted bidder shall execute bond to the City of Mayville with good and sufficient security, to be approved by the Board of Council of said city, for the faithful performance of his contract, and the Contractor shall within ten days begin his work under said contract, and shall complete the same without delay.

Section 5. That, when the work is completed in accordance with the contract, the work shall be received by the said City Council upon a certificate from the City Engineer, stating that the work has been done according to contract, and the said City Council shall order payment for the same made to the Contractor by issuing of an order upon the City Treasurer to pay same in full out of the "Street Improvement Fund."

Section 6. That, within thirty days after the signing of the contract by the Contractor for the original construction of the aforesaid street as herein provided, the Mayor of the City of Mayville is hereby authorized, empowered and directed to issue the bonds of the City of Mayville, in such sums as the Council may order, not exceeding the sum of the contract price for work, and all expenses attending the completion of the said work, including the expenses attending an issue of said bonds, which bonds may be redeemable by the city as follows, to-wit:

One-third thereof at the end of three years from their date; one-third at the end of seven years from their date; and one-third thereof on the day before the expiration of ten years from their date, and said bonds shall bear interest from date thereof until paid at the rate of six per cent. per annum, payable annually, and the same and all interest thereon shall be payable at the Bank of Mayville, Mayville, Kentucky.

Said bonds when issued shall be signed by the Mayor and Clerk of the Council with municipal seal attached and shall be sold and disposed of by the Mayor, City Clerk and Treasurer then in office for the most advantageous price, in no event, however, to be less than par, with accrued interest at the time of sale.

The bonds shall be in form and substance as hereinafter prescribed, and numbered consecutively from No. 1 to the number required, and shall be in denominations of five hundred dollars (\$500) each, except that one may be for a smaller amount than said sum to cover any remaining fractional part of five hundred dollars (\$500) said work may cost, with appropriate interest coupons attached. They shall bear date the 1st day of July, 1906, and shall be left in the hands of the Treasurer until negotiated.

Lime and Seed Potatoes. M. C. RUSSELL CO.

Personal

Mr. E. Houson was an Ashland visitor Sat-
urday.

Mr. Harry B. Owens is home from Asheville,
N. C.

Mr. Joe Reister of Cynthiana spent Easter
here with friends.

Mrs. D. L. Bush of Ashland is visiting rela-
tives in the county.

Mr. Keith Browning returned last afternoon
to his school at Lexington.

Mrs. Ed Pardon of West Second street is vis-
iting relatives in Cincinnati.

Lawyers Sallee & Slattery are attending Fed-
eral Court today at Covington.

Mr. Charles W. Gurney of Covington is on
a visit to old friends in this city.

Mrs. Eneas Myall has returned from a visit
to relatives and friends at Nepton.

Miss Lonie Bruer of Paris leaves for home
today after a short stay with friends here.

Mrs. Lotie Turner of Mt. Carmel is the guest
of her daughter, Mrs. C. P. Cook of Paris.

Mr. and Mrs. George H. Bishop were Easter
guests of Mr. and Mrs. T. J. Currey at Port-
smouth.

Miss Hannah O'Hare, who has been the guest
of her brother, M. A. O'Hare, returned to Chicago
Sunday.

Mr. Fred Richardson of the Richardson Oil
and Gas Company of Ohio Sundayed with Mr.
J. W. Prall.

Mrs. James H. Hall, Jr., and children have
returned from a visit to her sister, Mrs. George
Metch, Jr., at Carlisle.

Messrs. William and Charles Curran of Cin-
cinnati spent Easter with their mother and
brother, Mrs. Hannah C. and Mr. Harry C. Cur-
ran.

Miss Ida Martin of Covington arrived yester-
day afternoon, being accompanied by the sudden
death of her grandmother, Mrs. Harriet Bal-
win.

Editor M. A. Donovan of The Winchester
Democrat, accompanied by his wife, came down
Saturday to spend Easter with relatives and
friends in this city.

Mr. Sam F. Dangherly, who is holding an
office position with Procter & Gamble, Cincinnati,
came up Saturday night to spend Sunday with
his parents, Mr. and Mrs. H. B. Dangherly of the
New Central Hotel.

Mr. and Mrs. Z. A. Kay of Mt. Orab, O., en-
tertained during the Easter season the Rev.
Randall and wife of Kensington, O., John Ran-
dall and wife of Norwood, Mrs. Sallie H. Kay
of Maysville, and Miss Myrtle Kay of Glendale
College.

Mrs. J. Hawthorne Hill of New York City is
the guest of Miss Beaula Johnson of West
Fourth street.

Mr. M. J. Dorsey, one of Newport's popular
men, spent several days here last week. Mr.
Dorsey is Reporter for R. G. Dun & Co.

There was one addition to the Third Street M.
E. Church yesterday.

Rev. Father Cusick of Brooksville has been
assigned to Paris, Father Burke having re-
signed on account of ill health.

CORDIAL INVITATION

ADDRESSED TO WORKING GIRLS

Miss Barrows Tells How Mrs. Pink-
ham's Advice Helps Working Girls.

Girls who work
are particularly
susceptible to fe-
male disorders,
especially those
who are obliged
to stand on their
feet from morn-
ing until night in
stores or factor-
ies.

Day in and day
out the girl toils,
and she is often the bread-winner of
the family. Whether she is sick or
well, whether it rains or shines, she
must get to her place of employment,
perform the duties exacted of her—
smile and be agreeable.

Among this class the symptoms of
female diseases are early manifest by
weak and aching backs, pain in the
lower limbs and lower part of the
stomach. In consequence of frequent
wetting of the feet, periods become
painful and irregular, and frequently
there are faint and dizzy spells, with
loss of appetite, until life is a burden.
All these symptoms point to a de-
rangement of the female organism
which can be easily and promptly
cured by Lydia E. Pinkham's Vegeta-
ble Compound.

Miss Abby F. Barrows, Nelsonville,
Athens Co., Ohio, tells what this great
medicine did for her. She writes:

Dear Mrs. Pinkham:—
"I feel it my duty to tell you the good
Lydia E. Pinkham's Vegetable Compound
and Blood Purifier have done for me. Before
I took them I was very nervous, had dull
headaches, pains in back, and periods were
irregular, I had been to several doctors, and
they did me no good.

"Your medicine has made me well and
strong. I can do most any kind of work
without complaint, and my periods are all
right.

"I am in better health than I ever was,
and I know it is all due to your remedies. I
recommend your advice and medicine to all
who suffer."

It is to such girls that Mrs. Pink-
ham holds out a helping hand and ex-
tends a cordial invitation to correspond
with her. She is daughter-in-law of
Lydia E. Pinkham and for twenty-five
years has been advising sick women
free of charge. Her long record of
success in treating woman's ills makes
her letters of advice of untold value to
every ailing working girl. Address,
Mrs. Pinkham, Lynn, Mass.

The Memory of Quality Remains Long After the Price Has Been Forgotten.

fire had already eaten its way through one tie
before it was extinguished.

EASTER SERVICES

Gloomy Weather, But Good Crowds
at All the Churches

It was too bad that yesterday should have
turned out to be such a dull, cloudy, cold and
sombre day when the feminine portion of the
community had prepared and looked forward to
Easter Sunday as the day of days on which to
appear in their spring millinery and garments
of the latest fashion plate. It was a day for
heavy wraps and winter shades; light and bright
colored spring apparel was conspicuous for its
absence.

There was compensation, however, in Church
decorations and splendid sermons delivered by
the Pastors of the various Churches who told
the old, old story in an ever new and interesting
and delightful way. The singing at all the
places of worship was exceptionally fine and
had been arranged and prepared especially for
the occasion.

Success has crowned our efforts of untiring en-
deavor and we present to the public with a confi-
dence never before held by any other medicine
Hollister's Rocky Mountain Tea. 35 cents, Tea
or Tablets. J. Jas. Wood & Son.

Federal Judge Spear at Savannah ordered
Greene and Gynor to be taken to Macon, Ga.,
for safe-keeping.

Israel Ludlow of New York, inventor of the
aeroplane, was probably fatally injured by a
fall from his machine at Atlantic Beach, Fla.

Willie Hloppe, the world's champion billiardist,
was beaten by a score of 500 to 245 by George
Slosson in the National Billiard Tournament.
The result was a big surprise.

Three persons were killed and twenty in-
jured, eight of them seriously, in a panic which
followed a cry of fire in a Catholic Church at
Twenty-fourth street and Albany avenue, Chi-
cago.

The Navy Department has received word of
a serious accident on the battleship Kearsarge,
while she was engaged in target practice near
Culebra. An explosion occurred in one of the
forward turrets. Lieutenant John M. Higgins
and five men were killed, and one officer and a
number of men slightly injured. The men
were buried at Guantanamo.

In the presence of a distinguished assemblage,
with the President of the United States taking
a prominent part, with the Supreme Court and
the Senate, the House of Representatives and
the Diplomatic Corps as spectators, and before
a large concourse of people, the cornerstone
of the office building of the House of Repre-
sentatives was laid with impressive ceremonies
in Washington Saturday afternoon. The ad-
dress of the day was made by President Roose-
velt.

Attorneys representing John A. Dowie and
the Zionists are still in conference in Chicago
with the hope of reaching a basis of compro-
mise.

HERE AT HOME.

**Maysville Citizens Gladly Testify and
Confidently Recommend Doan's
Kidney Pills.**

It is testimony like the following that has
placed "the old Quaker Remedy" so far above
competitors. When people right here at home
raise their voice in praise there is no room left
for doubt. Read the public statement of a
Maysville citizen:

Henry Bertram, shoemaker, of 27 East Third
street, Maysville, Ky., says:

"I believe everybody in Maysville has read in
the papers the testimony I gave in March, 1900,
about Doan's Kidney Pills, for I have been asked
again and again by residents of this town if
that statement were true. For the benefit of
persons who may now be suffering from forms
of kidney trouble I repeat my testimony. Be-
fore I got Doan's Kidney Pills at J. James Wood
& Son's Drugstore I had suffered for some time
with backache and a tired feeling and having
aching in and about the kidneys. Being a shoe-
maker, I thought my trouble was caused by my
work, for every time I took cold it settled in
my back, but Doan's Kidney Pills quickly rid me
of the trouble and never, from that time to
this, have I had any cause to complain of my
back or kidneys. Doan's Kidney Pills perform
exactly what they promise, and to be honest
with you, I will say that in my opinion there is
no remedy for kidney disorders equal to Doan's
Kidney Pills."

For sale by all dealers. Price 50 cents a box
Foster-Milburn Co., Buffalo, N. Y., sole agents
for the United States.

Remember the name—Doan's—and take no
substitute.

OUR BARGAIN TABLES

Are set for Easter buyers. Such a lot of Shoes and Slippers were never before offered to our customers. Special for Easter:

Ladies' \$3.50 Patent Colt in the newest styles go at \$2.49. Ladies' Patent Colt and Vici, worth \$3, all go at \$1.99. One lot fine Ox-
fords in black and tan, worth \$2.50 to \$3, all go at \$1.49. One lot worth \$2 to \$2.50 will go at \$1.24. Look over the 99c lot; many fine ones
in it. Men's Shoes and Oxfords, as fine as you can find, as good as can be made; the sole leather in these shoes cost 64c per pound; this lot
was made expressly for this Easter trade, designs selected by W. H. Means. Boys, they are beauties and just right, and are sold for \$5 and
\$6 in many cities; our special for Easter \$3.49. Plenty of cheaper ones. Come and get the best and save money at

DAN COHEN'S Great Western
Shoe Store. **W. H. MEANS,**
MANAGER.
